Also merged into effect-start, effect-boxes, effect-atom-svelte, effect-attio and eftar · Creator of **Awesome Effect**, 92 stars.

Experience

Listening.com — Jan 2025 — now
Full Stack TypeScript Developer · Own the whole stack: API, web, mobile, desktop, browser extension

- Own backend, web, React Native, Electron and Chromium extension end to end, from design to release
- Shipped CarPlay, Apple Watch, iPad and offline playback in the mobile app
- Built Google Drive, Dropbox and ChatGPT imports, the PDF-to-audio pipeline and an agent QA CLI

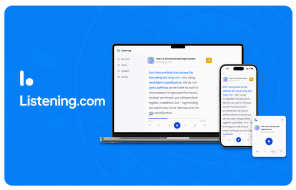

Upwork — Jun 2024 — now
Full Stack TypeScript Developer · 10+ projects for international clients

- Built GiftSong.ai end to end: personalised AI songs, videos and payments
- Shipped Walking Meditations to iOS and Android with Expo
- Built the MathForBusiness learning platform in Astro and React

Projects

Better Fullstack — Maintainer
Visual builder, CLI and MCP server that scaffolds full-stack apps in TypeScript, Rust, Go, Python and Java. Independent fork of Better-T-Stack since Jan 2026, published on npm.

Listening.com apps — Full stack
One product on five surfaces: Hono API, TanStack web app, React Native iOS and Android app, Electron desktop app and WXT Chromium extension.

Skills & tools

- Languages & frameworks: TypeScript, JavaScript, React, TanStack, Astro, Next.js, Effect-TS
- Apps & interfaces: React Native, Expo, Electron, WXT, Tailwind CSS, shadcn/ui, Motion
- Backend & data: TanStack Start, HonoJS, Supabase, PostgreSQL, Drizzle ORM, Convex
- Tools: Bun, Codex, Claude Code

Background

BSc Computer Science, 2022—2026
Odesa National Polytechnic University

English fluent · **Ukrainian, Russian** native
Arabic and Turkish basic
